

# Get Ready for a Seamless Transition to Woodstock Mobile

- Have your Woodstock Communications account available or a copy of your invoice.
- Your Woodstock Mobile account will have to be on auto pay and paperless billing.
- Know what type of phone you have and whether it uses a physical SIM card.
- Backup any important data including voicemails.
- Have your account number, account holder name and billing address exactly as shown on your bill from your current carrier (when entering your account number, you may need to add or remove dashes).
- Request a Number Transfer PIN from your current provider.
- Make sure you are connected to Wi-Fi.
- Once the transfer is complete, restart your phone, stay on Wi-Fi and test your service.

*Download the My Mobile app from the Google Play Store or the Apple App Store.*
